Additional Notes:

Mr. Jernigan came to Senior Care of Marion after being in the hospital with a diagnosis of COVID-19 and pneumonia. Mr. Jernigan also has post polio syndrome which has affected his L arm and L leg. Upon admission Mr. Jernigan was unable to perform bed mobility without maximum assistance for lying to sitting at the edge of bed. Pt was also unable to stand without assistance at bedside. Pt was unable to ambulate for first week he was here. Mr. Jernigan put forth extreme effort to improve not only his strength, but his endurance by participating in PT and OT 5 times a week for approximately 6 weeks. Upon discharge Mr. Jernigan was able to perform bed mobility with no assistance, transfer himself in and out of bed with no help, and able to perform his personal grooming with no assistance. Mr. Jernigan was able to ambulate using a rolling walker for approximately 300ft and able to stand to perform tasks for greater than 5-10 mins. He was so happy to be able to go home feeling a sense of security to be able to take care of himself.
